

On the heels of the success at Guilford Technical Community College in March 2009, the Piedmont Triad Partnership is proud to present the **second regional Technology Career Days at Randolph Community College on October 27-28.**

We will again be exposing area students to technology careers related to design, manufacturing and logistics through tours, hands-on exhibits and interactive displays. This time we will be adding new features, like video conferencing to technology leaders.

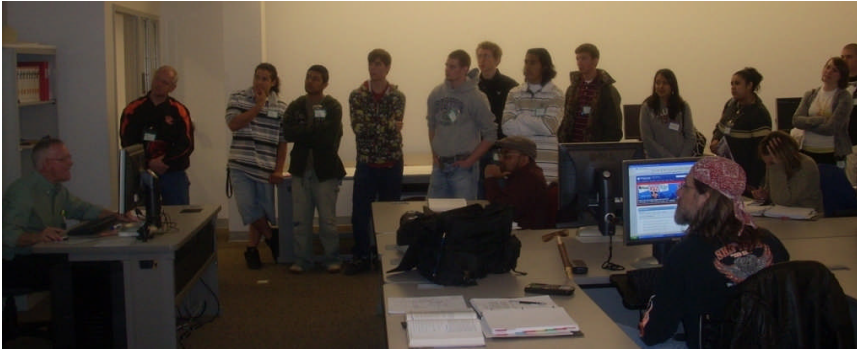

As always, the support of industry, education and professional organizations is vital for making this a successful day for the students. For industry, since this is not a job fair companies can participate regardless of whether there are current openings. This event is about getting students excited about technology careers, and knowledgeable about education pathways. For our education partners, this is an opportunity to showcase your programs to a wide range of students from throughout the region.

The event runs from 9 am to 2 pm at Randolph Community College in Asheboro, NC on October 27-28. Lunch and refreshments will be provided. There is no cost to exhibit. For more information see www.isa.org/TechnologyCareerDays2009.

Please take a moment to reserve your booth at this important event, respond to Wanda Parker at wparker@piedmontriadnc.com now. Thank you for your participation and support.
